## Digital Blood Pressure Monitors

# Embrace Mobile Health Technology!

Monitor, track and share blood pressure measurement results from the convenience of an iPod Touch, iPhone or iPad device.

The iHealth Blood Pressure Dock turns an Apple device into an easy-to-use, clinically accurate blood pressure monitoring system. The intuitive iHealth App allows users to monitor their blood pressure from anywhere with the same reliability of physician office measurements. Advanced features within the App aid in interpreting reading results, maintaining a detailed personal history and sharing measurement history with physicians or other healthcare providers.
